

ABSTRACT

To provide a fluorine-containing resin powder coating composition giving a fluorine-containing resin coating film having a high
5 whiteness, and various articles having on an outer surface thereof a
coating film which has a high whiteness and can be produced by
applying the fluorine-containing resin powder coating composition.
The fluorine-containing resin powder coating composition is subjected
to baking at 300°C or more, and the fluorine-containing resin
10 composition for forming the coating film comprises surface-treated rutile
titanium oxide particles as a whitening agent.
